My name is Mithat. I graduated from the department of business administration in 2017. I have experience in various industries. But I realized that I am not happy with the work I do. I started working on software during the pandemic period. I started to feel good. Since that day, I spend my time improving myself and learning. I'm taking a frontend developer course with Angular and React js at Bilge Adam. I want to progress by working in a deep-rooted and big company by improving myself. Being a follower of technological and strategic developments in the sector, to grow and progress together with a company. Positions I am interested in Frontend Developer, React Developer, JS Developer

Work experience

- Service Delivery Consultant** Jul 2020 - Feb 2021
Mayen, Izmir
I helped to Arçelik customers in solving technical problems in their household appliances. I forwarded the customers complaints to the relevant department
- Computer Operator** Mar 2019 - Aug 2019

Courses

- Front End Development with AngularJS and ReactJS** Oct 2021 - Mar 2022
Bilge Adam
In this training, the differences of server-side and client-side programming, the basics of the JavaScript programming language; Topics such as the use of jQuery, Bootstrap, TypeScript, Angular, ReactJS and Node.js framework are included.

Projects

- Film Project with React**
I developed a project where I can learn the basics of React .I designed the design part with Bootstrap.I used the axios library to pull the data.I used TMDB site as an API. I did not use any hooks and state management.We can apply crud operations on movies. You can find the source code at this link. (<https://github.com/karamithat/my-movies>)
- Weather App**
I developed a simple weather app. I designed the design part with Css3. I just used Vanilla JS. I used openweathermap site as an API.
- Books App**
I developed with React. I used Context Api as state management. We can provide theme changes on the site. We can apply crud operations on books
