MITHAT KARA

Full Stack Developer & Web and E-commerce Support

I am a creative and results-driven Full Stack Developer with hands-on experience in designing, developing, and deploying impactful web applications across various industries. I am proficient in modern frontend technologies, including HTML5, CSS3 (SASS, LESS), JavaScript (ES6+), TypeScript, React, and Next.js. On the backend, I work with Node.js, MongoDB and PostreSQL.

I specialize in building responsive, accessible, and user-centric interfaces that align with business goals. I have experience with Agile and Scrum methodologies and place a strong emphasis on teamwork, communication, and continuous improvement. I am known for delivering scalable solutions, collaborating effectively with cross-functional teams, and contributing innovative ideas throughout the project lifecycle.

Feel free to explore my projects in detail on my portfolio website and GitHub.
